DEVANSHI TEGWAL

Dear Hiring Manage,

I am excited to apply for the Data Analyst position at Paytm. As a B.Tech graduate in Computer Science and Engineering, I possess a strong foundation in core subjects like Operating Systems, Computer Networks, Database Management Systems, and Object-Oriented Programming (OOPs). Proficient in Python, Java, and SQL, I can efficiently process and analyze data. I am skilled in data visualization using PowerBI, making complex data more accessible and insightful.

During my academic tenure, I worked on projects that applied computer science principles to data analytics, such as designing a Registration Form GUI application with seamless data management.
As an intern at the National Coding Club, I honed my front-end development skills (HTML, CSS, JavaScript) and learned the importance of teamwork and timely results.

In a recent project, "HR Employee Distribution," I used MySQL for data cleaning and PowerBI for visualization, providing valuable insights into employee demographics and turnover.

Beyond technical prowess, I served as Chairperson of the Robotic and Automation Society and Chapter Representative for Women in Engineering, enhancing my leadership and communication skills.

I am enthusiastic about contributing my analytical skills and computer science knowledge to drive data-driven solutions at Paytm. I am confident that my ability to interpret data and proficiency in programming and visualization tools will make me a valuable addition to your team.

Thank you for considering my application. I look forward to discussing further how I can contribute to Paytm's success as a Data Analyst.
Sincerely, Devanshi

Best Regards,

Devanshi Tegwal
